Installation Instructions

MR050B-KIT-CPRSR

MR050B Compressor Replacement

1. Cut the wires from the compressor half way between the compressor and the controller board. Remove the old compressor from its mount.

2. Strip the leads of the wires coming from the controller board.

3. Install the new compressor as shown using the standoffs, compressor grommets, #8 flat washers and #8-32 lock nuts. Crimp the wire splices attached to the new compressor's wires to the newly-spliced controller wires.
