

## ZC4210 / ZC4100 Zapper Cable Set-Top

# DVB-C, HEVC, HD Set-Top with optional 802.11n Wi-Fi

### **FEATURES**

- High-definition small-form STB solution
- Integrated DVB-C tuner/demodulator
- Full range of HD and SD video formats up to 1080p60
- HDMI 1.4™
- Compliant with EU power consumption regulations
- Range of middleware options available
- Range of conditional access options available including pre-integration with Titanium, Verimatrix and Conax
- Industry-standard DRM support including pre-integration with Microsoft® PlayReady®
- Optional 2x2 dual-band selectable IEEE 802.11n Wi-Fi
- Range of optional analogue outputs
- AVC only processor option (ZC4100)

#### **PRODUCT OVERVIEW**

The ZC4210 is a small-form cable HEVC set-top box solution for lower-cost but still high-performance DVB operations. The product uses the latest silicon technology to reduce size and power consumption while increasing processing. It is capable of functioning as a stand-alone device or, via its networking as part of a connected home network.

**High Performance** - a class-leading processor delivers impressive performance over previous generations of devices whilst reducing power. Its high-capability CPU lends itself to hybrid broadcast and interactive operations and the processor is capable of supporting all modern security architectures (CAS and DRM). A flexible memory configuration supports a rich software experience and, finally, highly-sensitive broadcast tuners make for high reliability in challenging signal conditions.

**High Quality** - High Efficiency Video Coding (HEVC or H.265) is the next-generation of video codec, offering up to 50% bandwidth savings on the H.264 standard. HEVC can be used by operators to deliver a superior quality-of-experience within the same cable bandwidth or to increase their existing capacity by re-encoding existing assets.

**HEVC H.265** 

**HDMI 1.4** 

**USB 2.0** 

**High Connectivity** - the ZC4210 integrates USB 2.0 and fast (10/100) Ethernet for the connection of peripherals and networking.

**Optional Modules** - the unit supports an optional IEEE 802.11n dual-frequency MIMO Wi-Fi block for wireless networking or can interface via its built-in fast Ethernet to external networking such as PLC. These modules are designed to build into an attractive and complimentary stack of components, allowing operators to extend ARPU in a staged manner.

The same unit also can be configured with an AVC only device for further costs savings, if HEVC is not required (ZC4100).

GENERAL SPECIFICATIONS Core Processor		GENERAL SPECIFICATIONS - CONTINUED Video Decode / Encode	
	Encoders	None	
2D processing up to 324 Mpix/s	Profiles	HEVC H.265 up to MP@L5.1; AVC	
		H.264 up to MP@L4.2; MPEG-2 up to MP@HL	
512 MB DDR3	Optional Codecs	WMV, DivX, VC1, VP8	
128 MB	Audio Decode		
	Sample Rate	32-192 kHz
