

SHPX3-15/B

0.9m | 3 ft Sentinel™ High Performance Antenna, dual-polarized,
14.400 - 15.350 GHz

Product Classification

Product Type	Microwave antenna
Product Brand	Sentinel®

General Specifications

Antenna Type	SHPX - Sentinel® High Performance Antenna, dual-polarized
Polarization	Dual
Side Struts, Included	0
Side Struts, Optional	1

Dimensions

Diameter, nominal	0.9 m 3 ft
--------------------------	--------------

Electrical Specifications

Operating Frequency Band	14.400 – 15.350 GHz
Gain, Low Band	41.3 dBi
Gain, Mid Band	41.7 dBi
Gain, Top Band	42.1 dBi
Boresite Cross Polarization Discrimination (XPD)	30 dB
Front-to-Back Ratio	73 dB
Beamwidth, Horizontal	1.5 °
Return Loss	17.7 dB
VSWR	1.3
Radiation Pattern Envelope Reference (RPE)	7298B
Electrical Compliance	Brazil Anatel Class 2 Canada SRSP 314.5 Part C ETSI 302 217 Class 4

SHPX3-15/B

Cross Polarization Discrimination (XPD) Electrical Compliance

ETSI EN 302217 XPD Category 3

Mechanical Specifications

Compatible Mounting Pipe Diameter

90 mm–120 mm | 3.5 in–4.7 in

Fine Azimuth Adjustment Range

±15°

Fine Elevation Adjustment Range

±15°

Wind Speed, operational

201 km/h | 124.896 mph

Wind Speed, survival

250 km/h | 155.343 mph

Antenna Dimensions and Mounting Information

Dimensions in inches (mm)					
Antenna Size, ft (m)	A	B	C	D	E
3 (0.9)	38.9 (987)	16 (407)	33.7 (855)	7.2 (183)	34.9 (887)

Wind Forces at Wind Velocity Survival Rating

Axial Force (FA)

3353 N | 753.785 lbf

Angle α for MT Max

30°

Side Force (FS)

1680 N | 377.679 lbf

Twisting Moment (MT)

1605 N-m | 14,205.447 in lb

Zcg without Ice

310 mm | 12.205 in

SHPX3-15/B

Zcg with 1/2 in (12 mm) Radial Ice

388 mm | 15.276 in

Weight with 1/2 in (12 mm) Radial Ice

87 kg | 191.802 lb

SHPX3-15/B

Packaging and Weights

Weight, net

24 kg | 52.911 lb

Regulatory Compliance/Certifications

Agency

ISO 9001:2015

Classification

Designed, manufactured and/or distributed under this quality management system

* Footnotes

Operating Frequency Band

Bands correspond with CCIR recommendations or common

allocations used throughout the world. Other ranges can be accommodated on special order.

For a given frequency band, gain is primarily a function of antenna size. The gain of Andrew antennas is determined by either gain by comparison or by computer integration of the measured antenna patterns.

The difference between the peak of the co-polarized main beam and the maximum cross-polarized signal over an angle twice the 3 dB beamwidth of the co-polarized main beam.

Denotes highest radiation relative to the main beam, at $180^\circ \pm 40^\circ$, across the band. Production antennas do not exceed rated values by more than 2 dB unless stated otherwise.

The figure that indicates the proportion of radio waves incident upon the antenna that are rejected as a ratio of those that are accepted.

Maximum; is the guaranteed Peak Voltage-Standing-Wave-Ratio within the operating band.

Radiation patterns define an antenna's ability to discriminate against unwanted signals. Under still dry conditions, production antennas will not have any peak exceeding the current RPE by more than 3dB, maintaining an angular accuracy of $\pm 1^\circ$ throughout

The difference between the peak of the co-polarized main beam and the maximum cross-polarized signal over an angle twice the 3 dB beamwidth of the co-polarized main beam.

For VHLP(X), SHP(X), HX and USX antennas, the wind speed where the maximum antenna deflection is 0.3 x the 3 dB beam width of the antenna. For other antennas, it is defined as a deflection is equal to or less than 0.1 degrees.

The maximum wind speed the antenna, including mounts and radomes, where applicable, will withstand without permanent deformation. Realignment may be required. This wind speed is applicable to antenna with the specified amount of radial ice.

Maximum forces exerted on a supporting structure as a result of wind from the most critical direction for this parameter. The individual maximums specified may not occur simultaneously. All forces are referenced to the mounting pipe.

Maximum side force exerted on the mounting pipe as a
